E-Prescribing Consent

E-Prescribing is defined by a physician's ability to electronically send an accurate, error free, and understandable prescription directly to your pharmacy. Congress has determined that the ability to electronically send prescriptions is an important element in improving the quality of a patient care E-Prescribing greatly reduces medication errors and enhances patient safety. The Medicare Modernization Act 2003, listed standards that have to be included in an E-Prescribing program. These include (1) Formulary and benefit transactions, which gives the prescriber information about which drugs are covered by a drug benefit plan; (2) medication history transactions, which provide the physician with information about medications the patient is already taking to minimize adverse drug events.
